

The School of Civil and Environmental Engineering

Environmental Engineering Seminar Series Schedule

- Sept 10 Douglas Haith, Biological and Environmental Engr., Cornell University
Estimating Nutrient & Sediment Loads to Cayuga Lake
- Sept 17 Peter Hess, Biological and Environmental Engr., Cornell
Our Changing Atmosphere: What is Happening with Ozone and Why Should We Care?
- Sept 24 Thorsten Wagner, Penn State University
Understanding Model Behavior and Improving Model Identification Using Global Sensitivity Analysis
- Oct 1 Richard Brownell, Vice President, Malcolm Pirnie, Inc. Hazardous Wastes Program -
Bioremediation of Groundwater - Not Business as Usual
- Oct 8 Axel Bronstert, University of Potsdam, Germany
Quantitative Hydrologic Studies in Germany
- Oct 15 Linsey Marr, Virginia Tech
Direct Measurement of Urban Air Pollutant Emissions by Eddy Covariance
- Oct 22 Gang Chen, Earth and Atmospheric Sciences, Cornell University
Zonal Mean Atmospheric Circulation Response to Global Warming
- Oct 29 Carla Gomes, Applied Economic Analysis and Computer Science, Cornell University
Computational Sustainability
- Nov 5 Jason Phipps Morgan, Earth and Atmospheric Sciences, Cornell, University
Carbon Sequestration
- Nov 12 Frank Lombardi *Chief Engineer for the Port Authority*
Topic TBA
- Nov 19 Rick Luettich, University of North Carolina
Hurricane Storm Surge: Modeling the Past, the Present and the Future
- Nov 26 Thanksgiving
- Dec 3 Oliver Fringer, Stanford University
High-performance Computing for Environmental Flows

Seminars are at 4:30PM in Rm 366 Hollister Seminar Organizer: C. Shoemaker <cas12>

Titles or dates may be modified. Check www.cee.cornell.edu for updates
